BSc (Hons) in Information Technology Year 3

Lab 1 – Storyboards and Wireframes

SE3070 – Case Studies in Software Engineering   2024 Semester 2

In this lab you will get hands on experience of using different tools to come up with storyboards and wireframes.

** If possible sit with your group members.

There are lot of different types of tools available online to create storyboards and wireframes.

Try to do a bit of research on these tools and get yourself familiar around them.

Storyboards

Examples:

https://app.boords.com/
https://www.storyboardthat.com

** Coming up with a hand drawn story board is completely fine.

Wireframes
Examples:

Balsamiq Mockups
http://www.balsamiq.com/products/mockups
(Web demo free)

Mock Flow, web-based, free
http://www.mockflow.com/

Pencil, an open-source GUI prototyping tool

BSc (Hons) in Information Technology Year 3
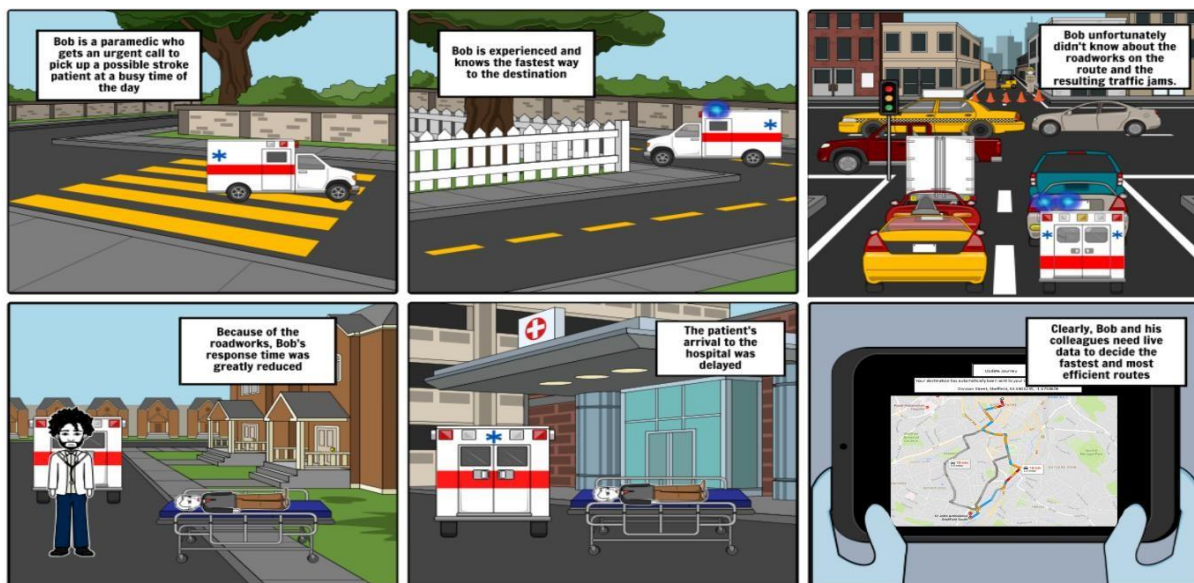

Lab 1 – Storyboards and Wireframes

SE3070 – Case Studies in Software Engineering   **2020 Semester 2, 2019**

Activity 1

Given below is a storyboard which narrates an issue faced by a paramedic in responding to an emergency.

Come up with a suitable wireframe to explain the above scenario.

Activity 2

1. Go through your allocated case study and select a scenario to come up with a storyboard. (before using the tool discuss with the group members to identify the proper flow)

2. Now try to create a high level wireframe for the story discussed above.

Submit both the storyboard and wireframe to the provided submission link on Courseweb for Activity 2. You can discuss this as a group but you should have an individual submission.
